The LECHUZA plant liner

Who knew planting could be this easy.

Planting is child's play with the LECHUZA plant liner. For example, if you would like to change your planting with the changing seasons, you don't have to change the whole planter – simply change the plant liner yourself. The sturdy carrying handles disappear back into the plant liner when not in use,

making it easy to set the new planting back into the planter. And this is the ideal way for your plants to overwinter with little effort. The sub-irrigation set is the perfect addition that lets your plants take care of themselves with water and nutrients, just like in nature. Unfold and see the next page for more information.

The LECHUZA plant liner

- Turns planting into child's play
- With stable, disappearing handles
- With overflow function for outdoor use
- A practical solution for overwintering
- Changing plantings is quick and easy

Simply lift out the LECHUZA plant liner for easy planting and ...

... just as easily set the planted liner back into the planter using the recessed handles.

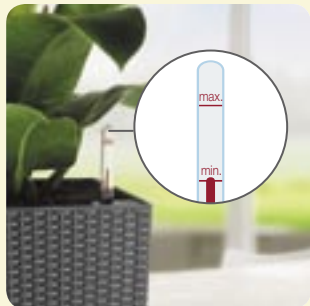

LECHUZA Cottage self watering planter: Lush greenery without a green thumb

Spend less time watering, more time enjoying. Whether you travel for several days at a time or simply have trouble finding time to care for your plants, LECHUZA is ready to be your own personal plant sitter. In fact, LECHUZA can take care of your plants for up to 12 weeks* and give them just the right amounts of water they need for optimal growth.

It's this simple: Just fill up the LECHUZA water reservoir and your plant will become self sufficient! The integrated water level indicator will tell you reliably when it is time to refill the reservoir with water and (if needed) liquid fertilizer.

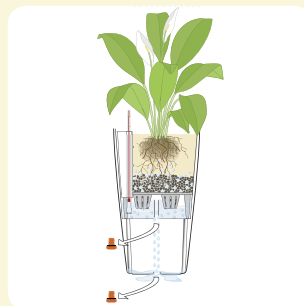

The water level indicator lets you see right away how much water is in the reservoir.

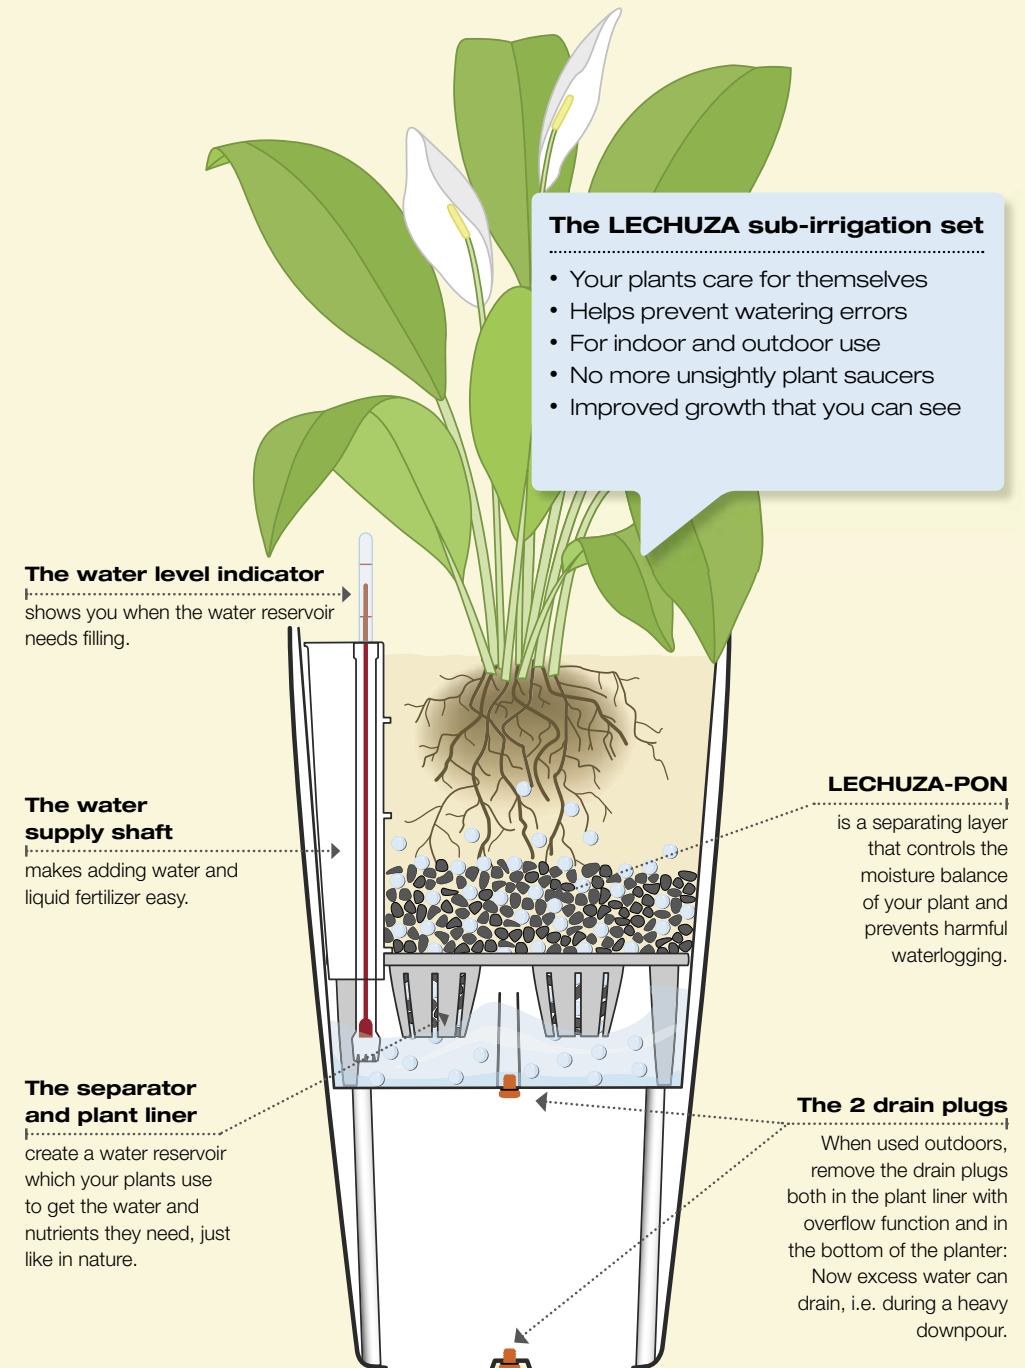

The sub-irrigation set. Magnificent growth following the example set by nature.

With overflow function for outdoor use.

*depending on container size, plant and climate

The LECHUZA sub-irrigation set

- Your plants care for themselves
- Helps prevent watering errors
- For indoor and outdoor use
- No more unsightly plant saucers
- Improved growth that you can see

LECHUZA Cottage

Self-watering planters with a textured surface.

LECHUZA Cottage planters are not only self-watering but indestructibly beautiful and unbeatably practical.

The new Cottage planters combine all of the advantages you've come to know and expect from LECHUZA planters such as being light-weight, UV-resistant, frostproof, weatherproof and shatterproof. What's more, thanks to an unfinished surface, Cottage planters are so robust and easy to clean that they

offer many advantages over conventional flower tubs such as those made of terracotta, for example.

- Available in 2 sizes and 6 attractive colors
- In the "All-Inclusive Set" with plant liner and sub-irrigation system
- Thanks to an integrated overflow function, it's the ideal planter for balcony, garden and patio!

Indoors and outdoors LECHUZA Cottage is the perfect planter.

- Robust Self-watering planter!
- Attractive textured surface
- Sturdy, high-quality plastic, no damage to the finish!
- Shatterproof, UV-resistant, Frostproof
- Overflow function makes it perfect for outdoors, too!

The innovative LECHUZA Cottage planters – for those who like plants more than watering
