# The Circular Parel Series, various Metal finishes

This very extended series of metal planters is available in a huge range of finishes. Each planter comprises two parts, an inner Polystyrol (plastic) pot, fully clad in a very high quality metal outer sleeve. They feature a unique recessed castor base that means the wheels are totally hidden. The inner pot as well as being extremely strong and resistant to denting is fully recyclable.

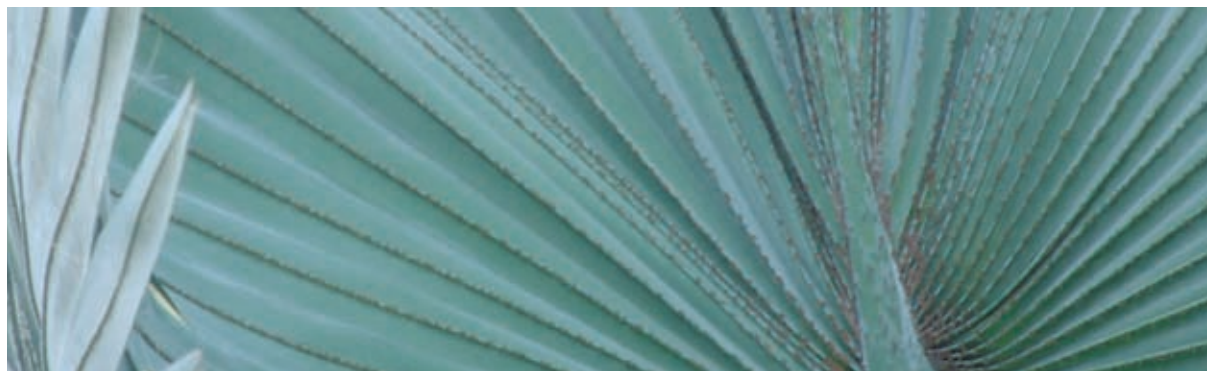

Once on site, if the customer wants to change the décor then these planters come into their own. Instead of having to invest in a totally new planting scheme, the sleeves can be slipped off and replaced with a new finish - for example from brushed aluminium to polished stainless steel.

All the metal sleeves are supplied with 'invisible' seams ensuring a perfect finish when viewed from all angles.

The metal finishes available are as follows

- Aluminium
- Stainless steel
- Stainless steel, unlaquered
- Hammered
- Crackle
- Silver Line (aluminium paint finish)

The Circular Parel series can be combined with any other Aluminium or Stainless Steel products featured in this brochure as the finish will be identical.

## Parel Brushed Stainless Steel

**Stainless steel brushed, laquered**  
**Edelstahl gebürstet und beschichtet**

A fully laquered brushed stainless steel outer for ease of maintenance supplied with inner pot and castors.

**Tableplanters stainless steel brushed, laquered**  
**Tischgefäße edelstahl gebürstet und beschichtet**

## Parel Brushed Stainless Steel, unlaquered

A first class stainless steel sleeve supplied without laquer finish to emphasize the colour and brushed effect.

The price includes the inner planter and castors.

This new line can be integrated into any interior. The combination of steel and the plastic inner make this an ideal planter for high flow areas where damage can usually occur. This particular series fully deserves to be called the Parel (Pearl) of planters.

# Parel Metal Cylinder Series (Pedestal

This range is available in many different sizes and finishes including:

- Stainless steel
- Stainless steel, unlaquered
- Aluminium

The Cylinder Parel series can be combined with any other Aluminium or Stainless Steel products featured in this brochure as the finish will be identical.

The programme includes 35cm and 40cm diameter cylinders which are new for this year.

The planting depth is the same as the height of the cylinder enabling you to decide on the depth you require for each plant.

## Parel Brushed and Polished Stainless Steel Cylinders

This excellent stainless steel cylinders are supplied laquered for ease of maintenance. Like all other Parel products, they are supplied with 'invisible seams' and can be easily used in combination with the Parel Circular and Multiform series. Available in both brushed and polished finishes

**Stainless steel brushed/polished, laquered**

# The Rectangular and Square Parel Metal Series

This completely new series is available in a number of floor standing and desktop sizes

Like the Parel Circular series, the planters are in two parts, a robust plastic inner pot including castor base and a high quality metal outer. As the sleeve is longer than the plastic inner in order to hide the castors from view, this range can only be used with castors fitted.

Available in the usual metal finishes:

- Brushed Aluminium
- Polished Aluminium
- Perforated Brushed aluminium
- Brushed Stainless Steel
- Polished Stainless Steel
- Perforated Brushed Stainless Steel

This series is ideal for use in barrier plantings and can be combined with the other metal series providing a complete solution throughout.

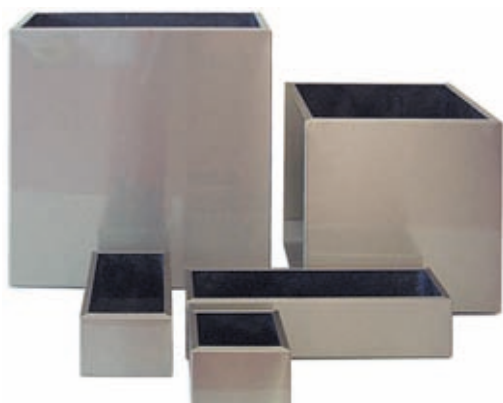

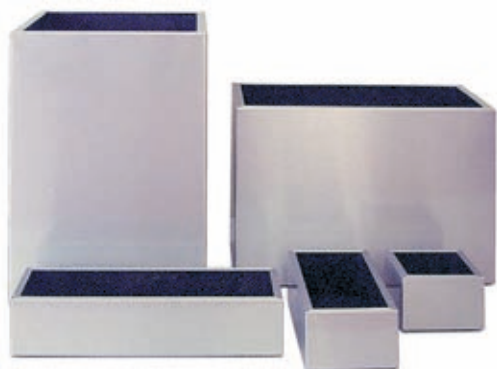

## Parel Square and Rectangular

This new line of planters comprises a robust inner plastic pot which is supplied with a strong metal sleeve. The metal sleeve features a right angle lip which rests on the plastic inner. With the exception of the table planters they are all supplied with castors which must be used in order that the inner pot is in contact with the sleeves top lip.

Available with planting depths of both 22 and 45cm (specify when ordering)

- The full range is available in both brushed Aluminium and Stainless Steel. Those sizes marked with a \* are also available in perforated and polished Aluminium and Stainless Steel. Other sizes can be supplied in these finishes on request and subject to a minimum order.

**Stainless steel and aluminium brushed, laquered**  
**Edelstahl und Aluminium gebürstet und beschichtet**

# Multivorm Circular Metal Series

These planters consist of a metal sleeve over an unpainted hydroculture planter with an integral castor base.

The inner pot is produced from Polystyrol (plastic) which is fully recyclable.

All Multivorm planters feature the 'floating effect' which means that the castors are hidden from view. This series can only be used with castors fitted.

Once on site, if the customer would like to change the décor then these planters come into their own. Instead of investing in new planters the sleeves can easily be slipped off and replaced with a new finish (i.e. from aluminium to stainless steel). All sleeves have invisible seams ensuring a perfect finish from all angles.

This serie is available in the following finishes:

- Aluminium brushed
- Stainless Steel brushed
- Hammered
- Crackle

These planters can also be combined with the same planters in the Parel range because of their similar looks.

# HD Stainless Steel Planters

This range of planters is fabricated entirely in stainless steel with an integral castor base. A special coating is applied to the inside while the exterior is brushed and features the invisible weld pioneered by Lune planters. The planters are not lacquered and so to ease maintenance a cleaning set comprising a spray and special soft cloth is available to prevent and remove dirt.

Large HD stainless steel planters can be combined with the standard Parel stainless steel range as the metal and brushed finish are identical.

## HD Stainless Steel Planters

# Lune Standard Aluminium Planters

The name Lune has long been known for quality and flexibility. For many years Lune have produced aluminium planters in a wide variety of shapes including circular, square, rectangular, bowls, vases, triangles, hexagonals etc. These planters are available in various metallic colours including aluminium, brass, copper, bronze and hammered. In addition the full range can be specified in various RAL colours.

The Lune series includes many standard sizes while specials can be fabricated in almost any size required. Most of the range can be supplied with a castor wheelbase. New this year are aluminium planters with a diameter of 1500mm and 1800mm. Available in the colour groups listed below (also available in various RAL colours)

## Colour Group A

## Lune Aluminium Circular Planters

This series of aluminium planters is available in a huge range of models, sizes and shapes. All circular planters are available with both a straight edge (82 series) and with an incurved lip (81 series). The 1500 and 1800mm planters are not coated inside and it is therefore essential to use a liner or to have the units GRP lined.

81 series (incurved lip) available from 180mm to 1220mm diameter  
82 series (straight edge) available from 180mm to 1800mm diameter

## Lune Aluminium Various Planters

These aluminium planters are available in a large number of forms and sizes including:

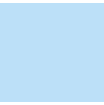

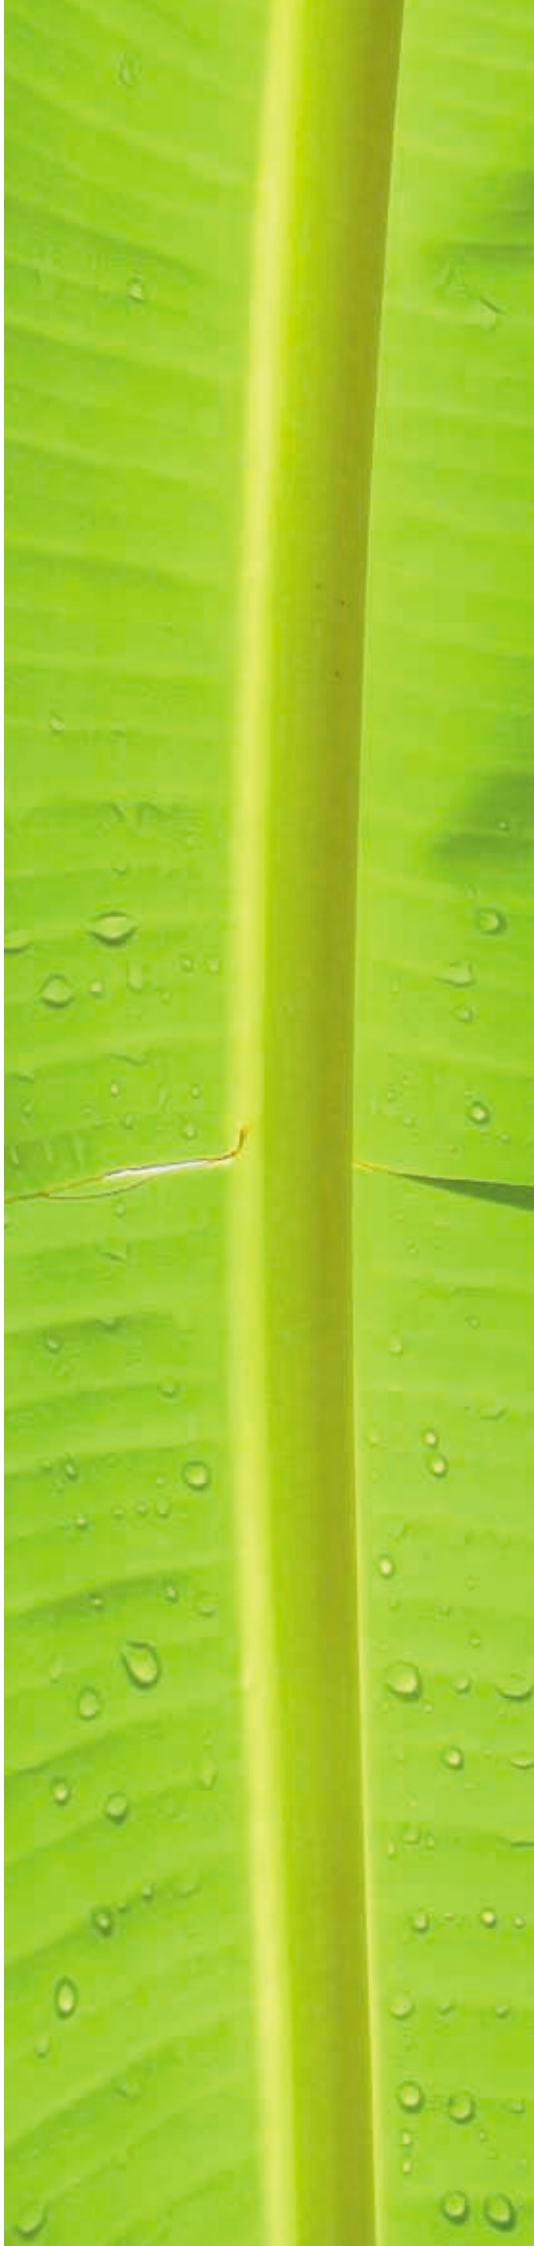

Half round planters (series 87000)

Triangular planters (series 88500)

Hexagonal planters (series 88305)

Quarter round planters (series 88700)

The above planters are available in colour groups A, B and C.

# The Elegant and Chique Series

These beautiful and exclusive planters are available in the following finishes

- Elegant Stainless Steel
- Elegant Zinc
- Elegant Synthetic
- Elegant Hammered Aluminium
- Chique Zinc
- Chique Hammered Aluminium
- Chique Lead Exclusive
- Chique Lead

Very desirable to look at each planter is made from natural materials. The Zinc planters are produced from 100% real zinc coloured by a special chemical process.

The Elegance series are also fitted with castor bases

All Elegance planters can be supplied with Tanker sub soil irrigation systems.

## Elegant Stainless Steel

Stainless steel brushed complete with castors  
Edelstahl gebürstet komplett mit Rollen

Conical shaped brushed stainless steel sleeve with a wide top lip.  
Like the Parel metal series, each has an inner plastic pot fitted with a recessed castor base.

## Elegant Planters - Hammered Aluminium

Almost a work of art, the conical shaped Elegant planters are handmade in beaten Aluminium, and feature a wide rim on the top. Like the Parel series, Elegant planters have a very strong inner pot on a castor base making them fully waterproof and superb for professional interiorscape use. The outer aluminium sleeve is, itself, 4mm thick, making it very resistant to damage from knocks. These truly elegant planters make a real contribution to any interior.

## Chique Lead Exclusive

## Chique Lead planter Exclusive Chique Blei-gefäß Exklusiv

This exclusive planter contains a wooden insert, specially coated to be water resistant. During manufacturing, lead sheet is rolled around the insert to form the planter shape. Lead is a soft material which shrinks and expands at temperatures under and above 50 degrees celcius. This is a natural process but means that these palnters may not be suitable for a sunny position. Other sizes can be manufactured on request.

# Bankirai wooden planters

Bankiri is a long lasting type of wood classified as Class 1. This means that products made from this material will last 15 - 40 years. It is not necessary to chemically treat Bankiri to extend its life as it is long lasting by its nature.

## Planters

Planters made out of Bankiri wood are long lasting and robust. For these reasons they are suitable for use in gardens, public spaces and parks. By finishing these planters with a natural oil, the colour and integrity of the product is preserved.

## Specification

- Fixings: stainless steel screws
- Robust planter with high quality finish
- No visible screws
- Odourless - so fine for use indoors
- Also available with wheels on request

## Bankirai wooden planters

This variety of tropical hardwood has been specially selected as it is ideal for planter construction. Each planter is finished with a tough, clear varnish and features a broad rim at the top. This product is suitable for use in high traffic public spaces and also for exterior landscaping. Standard heights are 45 cm, 60cm and 75cm with other sizes on request.

# Parel Wood Series

The basis of the Parel wood series is a robust ineer plastic planter with a recessed wheel base and castors ( as per Parel Metal Series).

The series is available in:

- Real wood
- Wood veneer

## Parel Wood

### Wooden sleeved planters Holz-manchett komplett mit Rollen

This series of wooden planters features a real wood sleeve approximately 1cm thick. The planter is sold including the inner pot and castor wheels.

Available in Beech, Cherry and Ash. Sleeves are also available with a stainless steel ring. Other wood types on request.

# Top series

This whole range of planters, which includes various different models, is ideal for use in the most modern environments. They can be supplied in any RAL colour and various other finishes providing the ideal solution for every situation. On every model a castor base is supplied as standard. Within the series the following product groups are available:

- a) Dual Top series
- b) Top Plus series
- c) Top series

## Dual Top planters

This conical model is manufactured in high-grade solid plastic making them very strong and fully recyclable. The full range of RAL colours is available. The range includes various heights of pedestals.

# The Plastic Parel Series

High quality planters produced in Polystyrol, a very strong, fully recyclable plastic. Paint finishes are applied using special undercoats to ensure the final finish is extremely robust and resistant to marking. These planters feature a recessed castor base meaning that wheels, if fitted, are completely hidden from view.

The following finishes are available:

- Standard - any RAL colour applied as described above
- Unpainted
- High shine
- Mat Laquered
- Hammered
- Kristal
- Metallic
- Rust Effect

## Parel Standard (Textured paint finish)

Synthetic Parel planters  
Kunststoff Parel gefässe

These robust planters are available in nine standard colours (see below).

All other RAL colours are available for a small additional cost and could also be finished to match corporate colours etc.

# Multivorm Hydroculture planters

High quality hydroculture planters produced out of Polystyrol (PS) which are fully recyclable. The painted planters have a special undercoat to ensure that the final finish is extremely robust and much harder to mark.

This serie is available in the following finishes:

- Standard (texture paint), obtainable in any RAL colour
- Unpainted
- High Shine
- Matt lacquered
- Hammered
- Cristal
- Metallic

This serie can easily be combined with the Parel series.

# Multivorm Standard

These robust and strong range is available in nine standard RAL colours (see list below). All other RAL colours are available for a small additional cost (colour surcharge). Because of the many colour possibilities this range can easily be integrated into every interior (think of corporate colours, etc.). All painted planters have a special undercoat.

## Standard RAL colours:

RAL 1013	Broken White
RAL 3005	Wine Red

# The Campana Doppio Bordo and Poly - Plus

- Campana Doppio Bordo

These planters are fabricated from extremely strong synthetics and fully recyclable. Beautifully made they are almost indistinguishable from real terracotta. Available in both light and dark terracotta, they are very suitable for exterior use being resistant to all weathers (-60 to +80 degrees centigrade)

The advantages of this range are:

They are a fraction of the weight of real terracotta and are easy to handle.

They are much stronger than terracotta and therefore ideal for public areas.

- The PolyPlus Series

A conical polyester planter with a broad lip in dark anthracite, ideal for exterior use.

## Campana Doppio Bordo Series

**D-B Synthetec (looks like real terracotta)**  
**D-B Kunststoff (nicht von echt zu unterscheiden)**

Synthetic terracotta planters with a very realistic look. Available in light and dark terracotta colours

## Poly Plus crackle

**Polyester planters**  
**Polyester Gefäße**

A unique process has been developed to provide this conical shaped planter range with a beautiful crackle finish, which is protected by a coating of clear lacquer. The crackle finish can be supplied in any combination of two colours, meaning a unique look can be created for each customer. Stock colours are black on white and white on black. The planters can, if required, be specially treated for outdoor use.

# H<sup>2</sup>O Planter

This specially designed planter series features a double walled planter with a special self watering system. The double walls act as an extra water reservoir. The special self watering system ensures that water is released from the reservoir when a certain level is reached and more water required.

A float system ensures the optimal water level is maintained. In this way the period between watering is lengthened.

A picture of the planter constructed in transparent material is shown to illustrate better how the system works.

These double walled planters are supplied with an attractive removable thick top lip so that the reservoir can easily be filled. The float system can be removed simply from the back of the planter for ease of cleaning.

This series is available in the following finishes:

Standard (Nine standard RAL colours)

- High shine
- Lacquered
- Hammered
- Crystal
- Metallic exclusive

This range can be used for both interior and exterior planting schemes

## H<sup>2</sup>O Planter

These special planters featuring a broad rim and special float system are available in two standard sizes. Other sizes will become available, as will castor bases as the range becomes established. For the various colour and finish choices please see the Parel Plastic range.

# Series Flora and Brilliant

Both series are produced from PE plastics and are completely recyclable. Various sizes and finishes are available as follows:

With integral pigmentation: The colour is in the plastic and therefore they are not damaged by scratching or dents and are suitable for use indoors and out. They do not deteriorate over time and so are ideal for use in public areas.

Colours available:

Black, Bright White, Light Grey and Brown

Granite: Here the colour is again integral to the planter but time in a granite finish and available in six colours

Granite middle grey

Granite sandstone

Granite dark grey

Granite blue

Granite bright grey

Granite green

High shine or matt laquered: Planters available in 4 RAL colours

RAL 9005 Black

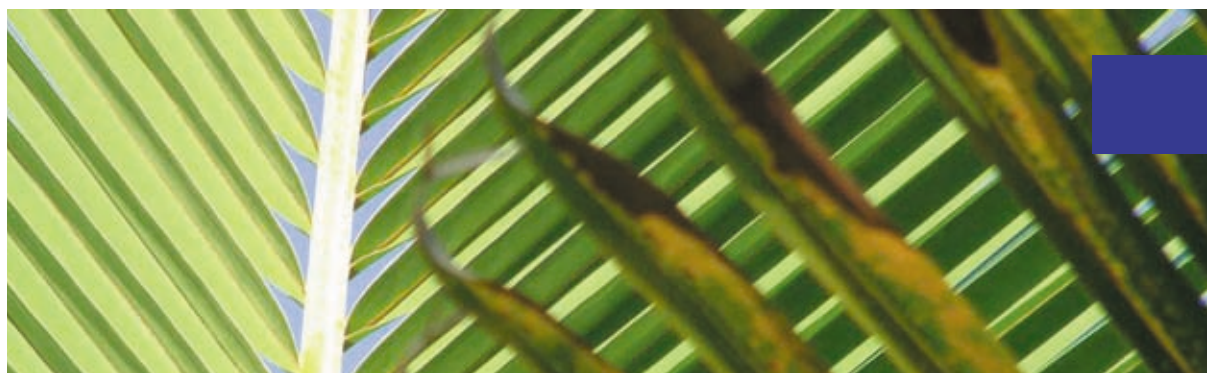

RAL 9006 White aluminium

RAL 9010 Bright white

RAL 7035 Light Grey

All other RAL colours available on request and at additional cost

The Flora planters have a broad flat lip and the Brilliant series a rounded top lip. Both ranges can be supplied with wheels (separate castor bases or blocks)

## Flora Planters

This extended series of planters has a broad flat lip and is available in the finishes described above

## 9) Spring aerosol leaf shine 600ml

hydroculture and soil use. 5l litre can

11) Spring liquid fertiliser for hydroculture and soil use. 500ml bottle

12) High pressure sprayer 5 litre

13) Leca granule gripper; to remove individual leca granules from water level indicator tubes

14) Spring leaf pest spray 200ml

15) Hand pump to remove excess water from planters

16) Plantclean (concentrate) for diluting with water. The effect can be changed depending upon the dilution rate. Available in 1 litre flasks and 5 litre bottles. Also kills leaf pests!

## The Range of Water level indicators and filler pipes.

This series of products is produced from PE plastic which is fully recyclable. Most of the range is available in sizes up to 120cm long. All water level indicators (excluding pen water level indicators) and filler pipes have a diameter of 4mm. These products can be printed with the name of a company, logo etc.

A Filler pipe, ideal for application of fertiliser.

B Combi water level indicator, with removable lid

C Water level indicator, standard

D Combi – Excellent water level indicator

Available in the following standard lengths

Size	12 cm 1)	19 cm 1)	22 cm 2)
	25 cm	29 cm 3)	30 cm
	31,5 cm 3)	35 cm	40 cm
	45 cm	50 cm	60 cm
	70 cm	80 cm	90 cm
	100 cm	120 cm	

- 1) All available as pen water level indicators
- 2) Not available as Combi – Excellent water level indicator
- 3) Available as water level indicator and filler pipe, especially for Parel planters.
